New Centre for Technology opens in Lyon

In order to provide the best support for our French customers, CMZ have built a 1000m² technical centre at Vaulx Millieu, close to Lyon.

As well as providing a base for service support, this facility has a permanent showroom with the full range of CMZ CNC lathes on display.

This technology centre will be the base for CMZ's subsidiary company in France. From here, hot-line support for all CMZ products will operate as well as being the centre for the technical team.

To celebrate the grand opening of this building, CMZ France have organised an open house on the 14th and 15th of June when visitors can view the machines and the new facility.
